

Modified Trap Field Set Up (not to scale – visual reference only)

Figure 1 – trap placement and angles

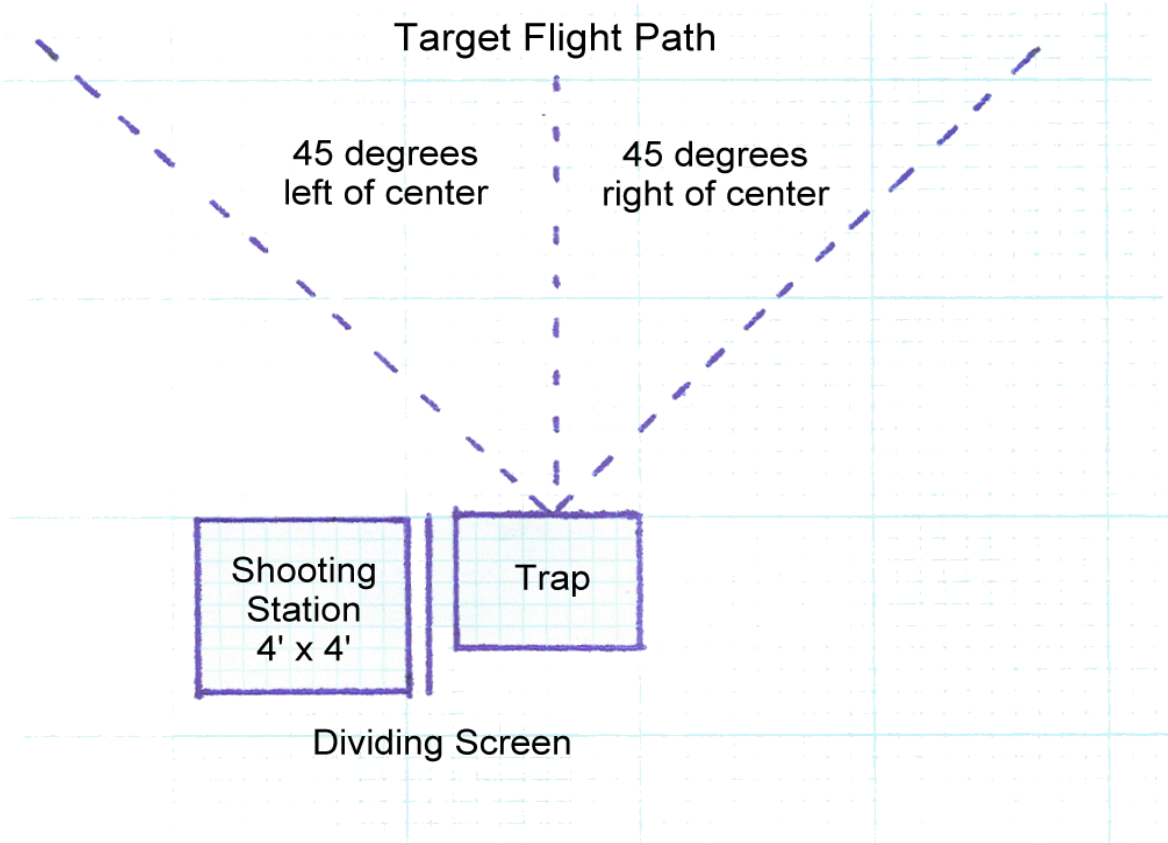

Figure 2 – setting target elevation on a Trius Trap

Magnetic protractors can be purchased for under \$10 at many local hardware or building supply stores. They may also be purchased online from many discount tool sources. Item pictured is available from Northern Tool.

For the protractor to read a true, an operator must be seated on the trap seat to remove "play" in the trap base.
